

# 3171

## Conduit Box

### Loading, separating and transporting conduits has never been easier

This unique, heavy-duty Conduit Box takes care of a few of the most annoying aspects of loading conduits and similar objects. The openings at the front and rear enable easy access to the load. By adding Accessory 3181, separating and accessing the load becomes even easier. The mid wall that is permanent is dividing the conduit box into two halves. The wire trace can then be inserted into one of the halves - very useful for getting shorter items out. The Conduit Box is City Crash tested.

### Features

- Constructed in aluminium
- Openings at the rear and front, equipped with slam locks
- Integrated safety plate in front
- Mounts onto Thule heavy duty bar 390-395
- Mounts onto all Thule bars with adapter 346 (Except Thule WingBar)
- Wire trace, Conduit Box Accessory 3181

### Benefits

- Maximum durability
- Double openings facilitate loading
- Lockable
- The permanent mid wall separates short and long conduits, and a wire trace makes the load easy to access (Conduit Box Accessory 3181)

### TECHNICAL SPECIFICATION

Load capacity 50 kg  
Size: 320x22x12 cm  
Mounts onto Thule heavy duty bar 390-395  
Mounts onto all Thule bars with adapter 346 (Except Thule WingBar)  
TÜV and DIN 75302 approved
